

OOG Spring Meeting, London 11th-13th April 2019
St Bartholomew's Hospital, West Smithfield London EC1A 7BE
Host Victoria Cohen

PROGRAM

Thursday 11th April 2019

14.30 Registration St Bartholomew's Hospital North Wing
15.00 YIN Young Investigators Network Meeting
Keynote Lecture, Richard Marais
16.30 High Tea in the Great Hall St Bartholomew's Hospital
17.15 Double Decker Open Top London Bus Tour
18.30 London Pub Experience

Friday 12th April 2019

08.00 Registration St Bartholomew's Hospital North Wing
08:25-08:30 Welcome from OOG committee and local organizer
08.30 OOG 1 : Intraocular tumors.
Moderators L. Zografos and B. Damato
08:30-08:40 An audit of retinal lymphoma treatment at the University of California San Francisco. B Damato.
08:40-08:50 Primary uveal lymphoma. A spectrum of clinical presentation. L Zografos
08:50-09:00 Primary uveal lymphoma: clinicopathological correlations. A Moulin
09:00-09:10 Ocular manifestations of leukemia and the treatment with intravitreal Methotrexate. V. Vishnevskia-Dai
09:10-09:20 Retinal vascular abnormalities related to neurofibromatosis type 1: a disease-related retinal capillary hemangioma? E. Midena
09:20-09:25 Vasoproliferative tumor in a child with NF1. D. Hadjistilianou
09:25-09:35 Ganglion cell layer thickness as a prognostic factor in the development of visual field defects in optic disc melanocytoma. An area effect. V. Papastefanou
09:35-09:45 Verteporfin Photodynamic therapy for intraocular vascular tumours. RN Hussain.

09:45-09:55 Results of various treatment approaches to retinal vasoproliferative tumours. R. Loginov

09:55-10:00 The first application of gamma-knife radiosurgery for diffuse choroidal hemangioma in a patient with Sturge-Weber syndrome. R. Loginov

10:00-10:05 Ocular sarcoidosis mimicking ring-melanoma. C. Faber

10:05-10:10 Retinal hamartomas in patients with PTEN hamartoma tumor syndrome. M. Tall

10:10 Coffee Break

10.50 **OOG 2: Retinoblastoma**

Moderators: T Hadjistilianou and F. Munier

10:50-11:00 Retinoblastoma Incidence in Europe Revisited. I. Didi Fabian

11:00-11:10 New strategies for non-invasive profiling of retinoblastoma. Elisa Gelli

11:10-11:20 Intraocular surgery of treated retinoblastoma eyes – long term results. Eva Biewald

11:20-11:30 A 13-Year Retrospective Analysis of Primary Intravenous Chemotherapy for Group D Retinoblastoma in the London Retinoblastoma Service. Mandeep S Sagoo

11:30-11:40 Intracameral chemotherapy for aqueous seeding in retinoblastoma: from proof of principle to current therapeutic management. F. Munier.

11:40-11:50 Conservative management of diffuse infiltrative retinoblastoma. C. Stathopoulos

11:50-12:00 Current organ-preserving treatment of the children with an intraocular retinoblastoma in Russia. I. Trofimov

12:00-12:10 Irradiation plans, complications and outcomes of single fraction radiosurgery of intraocular retinoblastoma: three-year results of a pilot study. A. Yarovoy

12:10-12:20 Anesthetic Management of supraselective ophthalmic arterial chemotherapy for retinoblastoma in children. N. Matinyan

12:20-12:30 Snowball seeding regression following combined IA. Doris Hadjistilianou

12:30-12:35 Malignant medulloepithelioma of the optic nerve with intraocular extension simulating a retinoblastoma. T. Ushakova

12:35-12:40 Multimodality treatment of retinoblastoma with subsequent esthesioneuroblastoma as a secondary cancer. V. Yarovaya

12.40 Lunch

13.45 **Keynote Lecture**, John Hungerford

14.15 OOG 3: Uveal Melanoma genetics and molecular biology.

Moderators: M. Jager and E. Kilic.

14:15-14:25 Germline risk factors for Uveal Melanoma. T. Bicer

14:25-14:35 BAP1 germline mutation -A case study of 4 patients. C. H.D.Le Guin

14:35-14:45 BAP1 germline mutations in pediatric uveal melanoma patients.

Natasha M. van Poppel

14:45-14:55 Are all BAP1 mutations in Uveal Melanoma one of a kind? J. Vaarwater

14:55-15:05 Outlier response to anti-PD1 in uveal melanoma reveals germline MBD4 mutations in hypermutated tumors. N. Cassoux

15:05-15:15 Secondary somatic driver mutations in G-protein related pathways and mutation signatures in uveal melanoma. U. Pfeffer

15:15-15:25 Comprehensive diagnosis, prognostic testing, and monitoring of uveal melanoma using gene panel analysis, low density whole genome sequencing and digital droplet PCR. M. Sommer

15:25-15:35 Next Generation Sequencing (NGS) in Uveal Melanoma (UM): The Liverpool Experience. Sophie Thor

15:35-15:45 A deeper insight into chromosomal aberrations, GNAQ/GNA11 and BAP1 somatic mutations in uveal melanoma prognosis. P. Silva-Rodríguez

15:45-15:55 Genomic characteristics of paired choroidal melanoma samples obtained before and after proton beam irradiation in patients undergoing endoresection. A. Matet

15:55-16:05 Matching of Cytogenetic and Molecular Prognostic Classifications of Uveal Melanoma. V. Yarovaya

16:05-16:15 Genome-wide methylation analysis identifies novel epigenetic modifications in metastasizing uveal melanoma. K. N. Smit

16:15-16:25 Conjunctival lymphatic recruitment in anterior extrascleral extension of uveal melanoma. R. Verdijk

16:25-16:55 Coffee Break

16:55 OOG 4: Uveal Melanoma clinics and systemic treatment

Moderators: A. Jousen and V. Cohen

16:55-17:05 Characteristics and prognosis of uveal melanoma associated with ocular melanocytosis. D. Malaise

17:05-17:15 25G Transretinal Biopsy of Choroidal Melanoma Without Vitrectomy and Tamponade. L. Sandri

17:15-17:25 Biopsy of small uveal melanoma with a thickness of 2.0mm or less. H. Heinmann

17:25-17:35 Tips and tricks for tumor endoresection. A. Jousen

17:35-17:40 Very late recurrence of iris melanoma: 45 years post treatment. R.T. Al-Jamal

17:40-17:50 External Validation of the Liverpool Uveal Melanoma prognosticator Online (LUMPO3): an OOG collaborative study. A. Eleuteri

17:50-18:00 Adjuvant Ipilimumab in Uveal Melanoma. D. Gombos

18:00-18:10 A Phase 1 Study of Percutaneous Oncolytic Rose Bengal Disodium (PV-10) for Metastatic Uveal Melanoma to the Liver. S. Patel

19.00 Gala Dinner reception drinks

19.30 Gala Dinner

Saturday 13th April 2019

08.30 Business Meeting

09.30 OOG 5 Melanoma radiotherapy and complications

Moderators: B. Damato and L. Zografos

09:30-09:40 Proton beam treatment for choroidal melanoma at the national center for hadrontherapy- CNAO Pavia Italy. Preliminary report. C Mosci.

09:40-09:50 Plaque Brachytherapy for Small Choroidal Melanoma – Treatment outcomes over a period of 5 years. R.T. Al-Jamal

09:50-10:00 Early ultrasonographic tumor regression after linear accelerator hypofractionated stereotactic photon radiotherapy of uveal melanoma as a predictor for metastatic spread. M.Zehetmayer

10:00-10:10 The need for additional treatment after ruthenium-106 brachytherapy of large choroidal melanomas. E.Korobov

10:10-10:20 OCT Changes in Peri-Tumour Retina following Ruthenium-106 and Proton Beam Radiotherapy for Uveal Melanoma. L.Gatchalian

10:20-10:30 Identification and classification of macular morphological biomarkers related to visual function in radiation maculopathy: a multimodal imaging study. R. Parrozzani

10:30-10:40 Neuroretinal inflammatory biomarkers anticipating radiation-induced macular edema. L. Frizziero

10:40-10:50 Delayed posterior nodular scleritis complicating tantalum clip surgery for choroidal melanoma treated with proton therapy. A. Schalenbourg

10:50-10:55 Scleral melting after conservative treatment in Uveal Melanoma. Report of two cases. V. Mazzeo

10:55-11:05 Unwrapped acrylic orbital implants for treating the anophthalmic socket. I.Rospond-Kubiak

11.05 Coffee/Tea Break

11.40 OOG 6 ocular adnexa and orbit

Moderators: S. Heegaard and D. Briscoe

11:40-11:50 Paraproteinemic keratopathy from monoclonal gammopathy of undetermined significance (MGUS) – an increasingly common manifestation of definite kerato-oncological significance. T. Kivela

11:50-12:05 Lacrimal gland tumors. G. Rose

12:05-12:20 Proton beam radiotherapy of the orbit. E. Hug

12:20-12:30 Core-needle biopsy of orbital tumours: histology, imprint cytology. S. Kleyankina

12:30-12:40 Degree of correlation between clinical and pathological diagnosis in conjunctival tumours. L. García Onrubia

12:40-12:50 Human papillomavirus in conjunctival intraepithelial neoplasia and carcinoma in a Danish, nationwide cohort. I Ramberg

12:50-13:00 Invasive conjunctival malignant melanoma mimicking ocular surface squamous neoplasia: a case series. B. Gallo

13:00-13:10 Conservative treatment of 92 eyes in conjunctival melanoma. S. Nahon-Esteve

13:10-13:20 Brachytherapy as adjuvant treatment in conjunctival melanoma. C. García-Álvarez

13:20-13:30 Orbital exenteration in the management of conjunctival melanoma: a study of 32 cases. S. Lemaitre

13:30-13:35 Solitary subconjunctival reticulohistiocytoma: a case report and review of the literature. J. Sergenti

13:35-13:45 Ocular adnexal lymphoma in Denmark. L. Hjorth Mikkelsen

13:45-13:55 Epibulbar malformations: surgical treatment. S.V. Saakyan

13:55-14:00 Kaposi's sarcoma with eyelid involvement. G. E. Sukhova

14.00 Meeting closed by the president of the OOG

Posters

Colon cancer and IgG4-related disease. S Lemaitre.

Episcleral pigmented nodules. Hatem Krema
